- Label printer
 - PaperNearEnd function*: Alert that paper is running out
- High-end PC with outstanding Intel® Dual Core processor for optimum performance and perfect graphics, minimum power consumption
- High-end Bizerba software package*
 - RetailPowerScale scale software
 - RetailApps for additional functionality
 - RetailFramework
 - RetailIntegratorsKit (RIK) for 3rd-party software

Bizerba XC 300

The XC 300 fulfills all essential retail tasks: Labeling, printing, cashing, weighing, advertising and advising customers. This allows it to be used individually and flexibly in the existing store concept. This multifunctional device is an ideal price labeler for labeling of prepacked products. Combined with a cash register drawer it can be used at the same time as a high-performance cash register solution. In conjunction with an external load receptor the XC 300 is a perfect weighing solution. The open PC platform is high performance and future-proof. New functions or customer-specific requirements can be realized: quickly, easily and affordably. Even the use of 3rd-party software presents no problem. The Easy Load printer stands out in terms of its easy paper change function. Daily cleaning of the XC 300 can be carried out quickly and easily. This is possible due to the scale's compact design, the Easy Clean housing surface and the frameless Easy Clean display.

Software

RetailApps are true masters in terms of flexible implementation of customer needs. They are developed individually based on customer requirements and are docked on to the scale software RetailPowerScale via standardized interfaces. The advantages are clear: less development time, lower costs and investment protection thanks to care and maintenance.
