

BIOBASED STAR FILM is certified "OK biobased®" by TÜV Austria

The breakthrough solution for your outstanding sustainable packaging!

BIOBASED STAR FILM CONTRIBUTES TO THE FOLLOWING SDGs:

- Preserve food
- Ensure safe food
- Lower bacterial proliferation
- Longer shelf-life for fresh food

- Reduced fossil resources depletion
- Increased use of renewable raw materials

- REACH and CLP compliance (no SVHC)
- Post-industrial recyclability
- Reduced plastic consumption

- Reduction of greenhouse gases emissions (expressed in CO₂ equivalent)

Fabbri Group's policy for product development and sustainability

Fabbri Group is committed to provide safe and cost-effective products, functional to an adequate food preservation, in compliance with the most stringent regulations at the European and National level, and to a continuous improvement in terms of sustainability performance.

Fabbri Group's wrapping technology, designed for an optimised match of machine and film, allows a perfect packaging while minimising the usage of plastics.

As an official partner of VinylPlus®, Fabbri Group contributes to the European PVC industry's sustainability programme.

THE INNOVATIVE FILM FOR YOUR SUSTAINABLE PACKAGING

BIOBASED STAR FILM: SUSTAINABLE YET PERFORMANT

Meeting the sustainability priorities of retailers...

- Reduce food waste
- Provide healthy and safe products
- Improve environmental footprint (climate change mitigation, energy and resources saving)
- Ensure a responsible supply chain
- Sustainable packaging (waste reduction, environmental impact reduction)
- Contribute to the UN Sustainable Development Goals (SDGs)

Better performance in terms of:	BIOBASED STAR FILM	PE based film
Bio-based / renewable resources	✓
