

Programme Overview

Undercounter dishwashers, hood type dishwashers,
utensil washers

UPster® U / UPster® H – professional warewashing technology for new entrants, upgraders and shrewd spenders

The MEIKO **UPster®** offers cleanly designed technology at a fantastic price. That gives both entrants and upgraders the fastest route to a sparkling future. Enjoy a whole host of benefits that **UPster®** features: quick and easy ordering and delivery, versatile uses, modern design, added bonus of a third wash programme and the proven MEIKO quality such as the durable stainless steel dosing pipes.

UPster® U 400

Get glassware and washware sparkling clean in no time!

Easy to use with an intuitive key pad. Plus double-walled heat insulation to keep the heat in and minimise energy use.

UPster® U 500 G

Fits under nearly every counter

The new **UPster® U 500 G** glasswasher is a robust "all-rounder" for the counter area and will make your glasses shine. Thanks to the top wash system no corner remains dry. The simple operation and the many comfort features ensure a hygienic and convincing washing result. With its lower overall height, the **UPster® U 500 G** fits under nearly every counter. Whether mounted on a plinth, with integrated **GiO MODULE** in the base frame or at the rear of the machine.

Comfort options:

- MEIKO **GiO MODULE** technology

– **under the machine**

UPster® U 500

This machine gets everything perfectly clean

The new *UPster® U 500* handles dishes and glasses as well as larger items of washware with ease. With its appealing, modern design and the use of proven MEIKO technology, the *UPster® U 500* always cuts a fine figure even under the counter. And also the features speak for themselves: spacious wash chamber, comfortable self-cleaning programme, soft start for very gentle washing, three programme cycle times, convincing consumption values. And all for an absolutely fair price. That makes the *UPster® U 500* the cleaning star in the new price/performance class from MEIKO.

Comfort options:

- MEIKO *GiO MODULE* technology
- under the machine
H 940-970 mm
- at the rear of the machine

UPster® H 500

Combines ergonomics and power under one hood

The *UPster® H 500* offers powerful cleaning and best comfort in an easy-to-use package – especially with a high throughput in the dishwashing area. Even large or high washware can be simply and conveniently pushed into the *UPster® H 500* sideways. Now simply press down the hood handle and off you go: the automatic programme start initiates the wash operation. Another plus: when you open it the steam escapes to the rear and not into the face of wash personnel. With so much operator comfort, working almost becomes a pleasure!

M-iClean – warewashing technology in premium quality

Quality made by MEIKO: stainless steel, innovative cutting-edge technology, design und ergonomic comfort. The *M-iClean* system from MEIKO sets new standard: for a high functional and investment security.

The new generation of the *M-iClean U* undercounter dishwashing machines: The name is the same. But everything else has been rethought.

GiO MODULE, yes – but now completely integrated. That saves space, as well as installation and maintenance costs. Heat recovery? Yes, and now it is highly efficient. The name: *MEIKO ComfortAir*. Removes up to 80 % of steam. For convenient, comfortable and super speedy warewashing. And the hygiene? Yes. Superlative. The fresh water circulates in a completely separate system.

The new
generation
M-iClean U
With heat recovery system
ComfortAir
and fully integrated
reverse osmosis
GiO MODULE

M-iClean US undercounter dishwashing machine

The *M-iClean H* hood type dishwashing machines offer more power and ergonomics than ever before: with a revolutionary automatic hood system that makes life much easier and more efficient for operators. Clearly reduced wash cycle times, fewer staff absences, and

reduced operating costs. Now fully integrated: the optional water treatment technology on the basis of a reverse osmosis, the *MEIKO GiO MODULE*. That ensures a clean washware free of residues, without requiring any polishing.

M-iClean HL hood type dishwashing machine with *AirConcept* exhaust heat recovery and drying table

The new generation **M-iClean U** –
even faster, even drier and almost no steam when opening the door

The new **M-iClean U** with innovative heat recovery system **MEIKO ComfortAir**

Washing and saving much faster:

The new *M-iClean U* saves an entire 30 seconds per wash cycle using the innovative heat recovery system *ComfortAir*

with a new design and increased size of the heat recovery tank. Saving time and resources: the operating costs are reduced by up to 21 %.

The new heat recovery system MEIKO *ComfortAir*: larger stainless steel heat exchanger surface...

... provides faster cooling. This causes steam to condense on the cool inner wall...

...and practically no steam escapes when opening the machine.

Opening the dishwashing machine with almost no steam: The air is clear even after opening the door after the wash cycle. No hot steam into the face of the wash personnel, no fogged-up glasses, no moisture on furniture. The staff is immediately excited about the pleasant indoor climate – and very motivated at work.

Almost dry: The new heat recovery system MEIKO *ComfortAir* condenses even more moist steam on the inner wall of the machine. That means that by the end of the cycle, the residual moisture is down by up to 98 % on the plates and up to 75 % on the glasses, so they are ready for use again after a short time. In addition, the water treatment in the form of a reverse osmosis system, the MEIKO *GiO MODULE* (optional), which is fully integrated into the machine, ensures the purest rinsing water and thus brilliant washing results without polishing.

On the place, ready to go

Compact structure and quickly installed: The new *M-iClean U* with the MEIKO reverse osmosis technology *GiO MODULE* eliminates the need for a time-consuming pre-installation or even expensive conversion work, as all the necessary components are installed in the machine. That saves you time, space and money.

MEIKO *Private Label*, the personal touch: MEIKO *Private Label* turns the new *M-iClean U* into a fully customised MEIKO machine. The welcome screen can be individually configured with a logo. In addition, up to three different images can be stored as screen savers, such as contact details for the service team.

Fine thing: the fine filter can be replaced easily and quickly. No annoying waiting for the service technician and above all no unnecessary maintenance costs.

Quality made by MEIKO: Stainless steel instead of plastic, innovative cutting-edge technology and design for a high functional and investment security.

Your benefits:

- saves 30 seconds* per wash cycle
- energy savings of up to 21 %
- up to 80 %* of steam reduction – for a better indoor climate without visible steam emission
- best drying results thanks to the reduction of residual moisture – by up to 98 %* for dishes and up to 75 %* for glasses

*All data compared to previous model. They are shown as maximum values and refer to savings when using the heat recovery system *ComfortAir*.

The new generation **M-iClean U** – stainless steel, innovative cutting-edge technology and design

M-iClean US

So small and yet so powerful

Measuring only 460 x 700 mm, the *M-iClean US* fits perfectly under any counter and is great for washing glasses as well as dishes. Its intuitive operating concept takes all the hassle and effort out of dishwashing. With the new heat recovery system *MEIKO ComfortAir*, the steam is reduced by up to 80 % at the end of the wash cycle. Dishes and glasses are so ready for use after some seconds. As a glasswasher with the *MEIKO GiO MODULE*, the technology for demineralising rinsing water, the glasses will turn out clean and free of residues with no need for polishing. This saves time and cuts down on breakages.

Comfort options:

- *MEIKO ComfortAir* heat recovery system
- *MEIKO GiO MODULE* technology
- Water change programme

M-iClean UM

Outstanding cleanliness in bistros and cafés

The *M-iClean UM* striking LED indicator handle offers an optimal overview and a convenient function control. The convenient glass display with intuitive one-touch operation is the control centre of the *M-iClean UM*. With the new heat recovery system *MEIKO ComfortAir*, the steam is reduced by up to 80 % at the end of the wash cycle and also saves valuable and expensive energy. This reduces the operating costs by up to 21 % compared to the previous model. And the best thing: The air is clear even after opening the door after the wash cycle. No hot steam into the face of the wash personnel, no fogged-up glasses.

Comfort options:

- *MEIKO ComfortAir* heat recovery system
- *MEIKO GiO MODULE* technology
- Water change programme
- Final rinse with cold water

M-iClean H with automatic hood system – a healthier and more ergonomic workplace

M-iClean H – Efficient, resource saving and perfect washing results

The unique MEIKO ergonomics concept: Designed for ergonomic use, the *M-iClean H* is much easier to load and unload, putting less strain on the operator's back and muscles and speeding up the whole warewashing process.

During comprehensive field testing, our customers have confirmed a time saving of approximately 30 minutes per day (at approximately 120 wash cycles per shift).

Easy and comfortable to load and unload

All it takes to open and close is a gentle touch from the operator

The automatic rack detection system saves on unnecessary handling

Hood type dishwashing machines with automatic hood system for glassware, dishes and utensils

The *M-iClean H* automatically detects when you have finished to load the machine. The hood closes then automatically and the wash cycle starts all by itself – completely without any contact, heaving, dragging or pulling. Instead, you have a little extra time to get on with other chores. The progress indicator on the intuitive and easily accessible operating panel shows how much time is left. As soon as the programme finishes, the hood opens up again, smoothly and silently.

The glasses and dishware can then be moved to the drying table, where the last few drops of water disappear. All that remains is to empty the racks, stack the things away, and you're done.

Adjustable working heights, versatile control system, intuitive, user-friendly operation – the MEIKO ergonomics concept realises a vision: washing without effort or physical strain, while maximising operational efficiency.

Plenty of space under the hood. Whether as a single or a double rack version: there is plenty of space under the *M-iClean H* for everything large or bulky. And the machine produces sparkling clean and hygienic results whatever the washware, from glasses and dishware to pots, pans and baking trays.

User-friendly and self-explanatory: the blue operating concept. Any parts that are blue can be removed, washed and replaced.

The *M-iClean H* automatically checks that everything has been put back in the right place.

Quality made by MEIKO: Stainless steel instead of plastic, innovative cutting-edge technology and design for a high functional and investment security.

Particularly ergonomic: the flexible operating panel. It is positioned exactly where it is needed – at eye level. So there's no need to bend down, strain your neck, or constantly shift from one place to another. It can be installed on the right or left hand side of the machine, or wherever is most comfortable.

Your benefits:

- Substantial wash cycle time reductions
- Significantly faster drying times
- Dishes ready for re-use faster
- Lower personnel and operating costs
- Reduction in lost working hours
- Easier and ergonomic motion sequences
- Optimum workplace evaluation

M-iClean H with automatic hood system – warewashing technology that saves time and makes life easier for the staff

M-iClean HM

Operating and economising miracle

Easier work, shorter wash cycle times, improved room climate, and perfect results thanks to sophisticated technology. With a flexible display, user-friendly automatic hood system, and blue operating concept.

Comfort options:

- *PowerWash* (3 pump motor settings)
- *AirConcept* exhaust heat recovery (Fig.)
